

The Island

C'est l'histoire d'une jeune fille se retrouvant bloquée sur une île sans aucuns souvenirs. Elle ne sera pas seule car elle se retrouvera avec plusieurs autres personnes et leur but sera de s'évader de cette île où il se passe des choses étranges. Cette histoire mélange de la dystopie, de l'aventure et un peu de romance. Vont-ils réussir à s'évader?

The Island

I have just woken up; I don't remember what happened. The only thing that I remember is my name: Amara. When I get up, I see that I'm on a beach. The sand is sweet; the water is clean and clear. There is a camp with a lot of huts made of wood very pretty, with flowers on the roof. The huts are surrounded by a lot of palm trees. Suddenly I see that a lot of people are looking at me and one of them comes to me.

- "Hello, nice to meet you, I think you may be lost but it's okay I will explain all the things that you have to know. Oh! I'm sorry I forgot to tell you, my name; I'm Neoma. And you, what's your name?

- My name is Amara

-Fine! Now come with me, I will present you all the crew and the jobs. This is Eric, his job is to take care of the vegetable garden. Here you have Lando, he's the cook. Here you have Idrysse, Neela and Millie who try to find an exit. To do that they explore the sea and the island. We called them finders. It's the most dangerous work. And to finish, it's my job (my job is): I take care of animals. In the next days you will choose your job because we have four rules: all the people have to contribute to the community life, never hurt one of us, have confidence in the entire crew and never go in the sea at night.

- Why can't we go in the sea at night?

-Because it's dangerous.

-Yes, but why? What's so dangerous at night?

- Dangerous creatures than can kill you. We called that the Demogriever. And before I forget, we don't have a chief because we are a family, don't forget it. Do you have any questions?

- Yes, how can I become a finder?

- What! You didn't listen to what I said. It's the most dangerous work.

- Yes, but I want to help, I want to be helpful.

- Ok if you want to be a finder, you have to speak to Neela. She's in charge of that. See you soon.

The Island

- Thank you for the visit. I will talk to Neela. See you soon”.

I was going to see Neela when suddenly I saw something strange in the water. I decide to take a closer look. When I was near the sea, I heard a sound as if the stranger thing calls me. I come closer and suddenly I feel something touch my shoulder. I turn my head and I jump when I see that it is Neela. She helps me to raise me from the floor and tells me that she has to talk to me. She explains to me that if I want to be a finder, the test session starts tomorrow at nine a.m. I answer that it's good for me and she leaves. I stay here, during a long time to see the water because I was troubled by the stranger thing that I have seen. When the night comes, I join all the crew to eat. During this time, we meet and discover a lot of things about the crew. It was late and I decide to go to sleep. During the night, I wake up cause of a nightmare. I decide to walk on the sand and I see a lot of creatures who are bioluminescent. It was very pretty when I heard the sound of footsteps. I turn around and I see Lando. We start to discuss but we don't see the sun rise. The crew wakes up and we go to join other people. It's 9 a.m., I start the test session. That during two hours and after that Neela said that I include the finders. I start tomorrow at 6 a.m. During all the day I help Lando to cook and we've become quite close. It was lunchtime and I start to talk with all the crew I'm feel like I have a new family. After the lunch all the people go to work. Neoma comes with me and we go in a calm place to discuss and we decide to make a surprise for all the crew. Indeed, with Neoma we organize a party for my arrival. We start to decorate all the palm trees with flowers, we cook a lot of meal. When all the crew arrive, they were very surprise and joyful. We make a party and when it was late I'm go to sleep. The day after, I go to my new job. I see Neoma and she gives me my new suit to go under the sea. She explains me the instructions and I go under the sea. In first plan, I see turtles, shells and a wide variety of fish. But when I go deeper, it was very dark, there are no fish, no turtles and no shells. It's

The Island

terrifying and sinister. There are wrecks and human carcass. I continue to visit when suddenly, I heard the same song that I have heard two days before. I decide to follow this voice. This voice takes me into a lighted tunnel. It was fluorescent and dazzling. I decide to return on the surface because it was late. I see Neela and I explain to her what I have seen under the water. She tells me that we will see that tomorrow and we join the other. We eat and we go to sleep because we are very tired. During the night, I can't stop thinking at what's happen today, under the sea. I decide to walk and to admire the stars in the sky. Suddenly, I see a shadow. I was scared but I decide to confront it. I take a sharp stone and I throw it. I decide to get closer when I see Lando on the floor a little bit knocked out. I help him to get up and we walk to a calm place. We decide to discuss and he explain me that he can't sleep because he makes nightmare about his past and he decides to explain to me his nightmares.

- "I was on a laboratory, you're with me...

- Me?

-Yes, you and we work for an organization called M.E.A.N.

We work and I see all the crew stuck here, on this Island.

-It's really terrifying, why us?

-I don't know. You think that is the truth?

-I don't really know but I thinks that is better if we don't tell about that at all the crew.

-You right.

-It's very terrifying because there are a lot a weird thing on this island.

-Why do you say that?

-You know, when I was explored the bottom of the sea, I heard a sound.

-A sound? What type of song?

-It was as if the sound calls me and wanted me to follow him.

So, I decided to follow this voice and I have discovered a fluorescent tunnel.

The Island

-Woah! You right, this island is very strange.

-Yes”.

After that we continue to talk while gazing at the stars. I think this is our new ritual. The morning comes and I follow him to help out to cook. We prepare eggs, bacon, waffles, pancakes, coffee, tea... After the breakfast, we decide with Neela, Millie and Idrysse to return where the voice took me. We start walking through the tunnel. There are a lot of symbols on the walls. We arrive in a big place with a lot of Demogrievs. We then understand that it's their landmark. But I see like an exit besides them. I try to explain that to Neela but she tells us to exit and return on the island. Back on the island, I explain what I see but Neela don't want to listen because she said that is too dangerous. It now the night and we have eaten, after four hours to sleep, I wake up and I can't sleep anymore. I decide to return at our place with Lando because I want to talk to him about what's happened under the sea with Neela. I watch the stars and he arrive. We start to talk and I was little cold so he hugs me to warm me up. And we continue to talk as usual. The morning comes and I try to go near Neela to talk to her about yesterday. To my great surprise, she tells me that we don't go under the water today with an angry face. I decide to don't listen her and to go under the sea. I return where we were yesterday and I'm getting closer to the door and look around me. All the demogrievs are inactive and I continue my way. When I'm in front of the door, I see that I need a code to open it. I searching everywhere in this place when I heard a sound. I was so scared and when I see where the sound is coming from, I start to swim very fast to return on the island with the crew. The sound was the demo-grievs wake up and try to eat me. When I arrive on the sand, all the crew come see me and ask me what happened. I try to explain what's happen when suddenly the demogrievs keep the water and come on the sand. We start to run, Lando take my hand and we run together to escape these creatures. We finally find a hiding place in the palm trees. I was

The Island

so scared but Lando was here for me and help me to breath. We heard all the crew screaming or run and suddenly we don't hear anything. We decide to go down of our hidden place. When we are on the floor, we join the other but two people are not here. It was Idrysse and Eric. I was shocked when Neela come in front of me and gets mad at me. I try to explain her that if I'm returned over there, it was to find an exit to help us. And I wasn't supposed to know they'd catch us. She tells me that I'm not a finder anymore because I'm too dangerous for the crew. I try to make her change her mine but she doesn't want to listen what I want to tell her. I'm so frustrated and I decide to help the group repair everything that had been destroyed by demogrievors. I decide to go talk to Neoma because she's very kind and I think she can listen to me because I needed. I'm with Neoma, we have talked about what's happened and she understand my point of view and she tells me that she will help me to discuss with Neela but not now because it was testing. She advises me to go to sleep and we can see what we can do tomorrow. I try to sleep and I managed to sleep for two hours but not more because I can't stop thinking of what happened today so I want to talk about that to Lando because I love speak with him and I think I start to love him a little bit. So, when I start to walk to our favorite place he was already here. When I arrive, he tells me that his happy to see me and that he knows that I will come here like all the night so he waits me. We talk about what happened today and we start to create a plan to exit this island because we can't stay more here. Like all the mornings, I help him to cook the breakfast and I go talk to Neoma the plan than we create with Lando tonight. She decides to create an urgency assembly. She explains at all the crew what we have discover like the place, the door... I explain that we need a code to open this door but there are all the demogrievors in this big place. Neela asks me what we are doing and I continue to explain but she stops me when I talk and said that is too dangerous. I said that we can't stay here

The Island

because we don't know what can happen like yesterday and I explain that we can lost another member of the crew so we have to keep this place as soon as possible. she counters by saying that we all have the comforts of life here and that we don't know what's waiting for us outside. Lando say that we can't survive more longer because Eric is dead and it was him who cultivated vegetables and fruits. Neela goes away because we we've upset her. So, we decide with Liam, Neoma and Millie to go in the depths to go in this place to find the code for exit this island. We arrived and we start to search the code when suddenly one demogriever wake up cause of Lando because he touches one. To protect him, I don't think very a long time and I find a rock that I throw on is head. He sees me and I swim to the tunnel where is blocked and I tore off its wall as if trying to retrieve a heart from inside it but in vain there was nothing inside but on its wall, I saw a logo marked M.E.A.N. This logo reminded me of something but I couldn't remember what. I return with the other and we Millie finds a lot of number on a wall when you touch it. We decide to return on the island and we decide to tell what's happened to Neela. Like we have the code, I purpose to leave the island tomorrow. All the crew was very impatient and go to the bed even Neela. The excursion of tomorrow keeps me awake. I decide to go talk to Lando for the last time. When he sees me, a smile spreads across those lips. He makes me a hug and we start to speak until I fell asleep on him because I was so tired. The next day we prepare food and tools that we need to face what wait us outside. We finally go, Millie tells me the code and we arrived in another tunnel without light in it but without water in it. We can walk without swimming. We finally arrived in front of a very large scale. We go up and we discover an earth completely destroy and we start to walk when we see a big building with the logo M.E.A.N. But that it's the beginning of another chapter...
